Kyocera Management Philosophy

Corporate Motto

"Respect the Divine and Love People"

Preserve the spirit to work fairly and honorably, respecting people, our work, our company and our global community.

Management Rationale

To provide opportunities for the material and intellectual growth of all our employees, and through our joint efforts, contribute to the advancement of society and humankind.

Management Philosophy

To coexist harmoniously with our society, our global community and nature. Harmonious coexistence is the underlying foundation of all our business activities as we work to create a world of prosperity and harmony.

Management Based on the Bonds of Human Minds

Kyocera started as a small, suburban factory, with no money, credentials or reputation. We had nothing to rely on but a little technology and trustworthy colleagues. Nonetheless, the company experienced rapid growth because everyone exerted their maximum efforts and managers devoted their lives to earning the trust of employees. We wanted to be an excellent company where all employees could believe in each other, abandon selfish motives, and be truly proud to work. This desire became the foundation of Kyocera's management.

Human minds are said to be easily changeable. Yet, there is nothing stronger than the human mind. Kyocera developed into what it is today because it is based on the bonds of human minds.

Kazuo Inamori Founder and Chairman Emeritus

Greetings

We are pleased to present to you our Report for the Year Ended March 31, 2015 (hereinafter, "fiscal 2015" refers to the fiscal year ended March 31, 2015, with other fiscal years referred to in a corresponding manner).

In fiscal 2015, the U.S. and Chinese economies were firm while the Japanese economy stagnated due primarily to a decline in personal consumption. With regard to the principal markets for Kyocera, demand for components expanded on the back of brisk production activities in the digital consumer equipment market, particularly for smartphones, and in the automotive related market coupled with steady growth in sales in the Equipment Business following the introduction of new products and measures to increase sales despite a slowdown in growth rate in the solar energy market in Japan. Amid this business environment, Kyocera posted another record high in consolidated net sales in fiscal 2015 following the record high posted in fiscal 2014. Profit from operations and income before income taxes decreased year on year due to the recording of one-time expenses as a result of a review of asset valuation in the Telecommunications Equipment Group and the solar energy business. Nonetheless, net income increased due to a decrease in tax expenses in line with a revision of the tax system in Japan.

Kyocera is planning to pay a year-end dividend of 60 yen per share for fiscal 2015 in light of the aforementioned results and our dividend policy. When aggregated with the interim dividend of 40 yen per share already paid, the total annual dividend for fiscal 2015 will be 100 yen per share, an increase of 20 yen per share compared with fiscal 2014 (based on the number of shares after the stock split undertaken on October 1, 2013).

In fiscal 2016, Kyocera will aim to further boost its financial performance by making the most of opportunities for growth in various markets through the collective capabilities of the Group. In particular, we will strive to strengthen existing businesses and create new businesses in the information and communication market, environment and energy market, automotive related market and medical and healthcare market as well as expand businesses in growing markets and strengthen management foundations with the aim of becoming a high-growth, highly profitable company.

We would very much appreciate your continued support of the Kyocera Group as we forge ahead with our endeavors.

Tetsuo Kuba Chairman of the Board and Representative Director

Goro Yamaguchi President and Representative Director (Accompanying Documents for the 61st Ordinary General Meeting of Shareholders)

Business Report (April 1, 2014 to March 31, 2015)

1. Current Conditions of Kyocera Corporation and its Consolidated Subsidiaries

(1) Business Progress and Results

The Japanese economy in fiscal 2015 stagnated on the whole due to a decline in personal consumption as a result of an increase in the consumption tax rate, despite an upward trend in exports and public investment. The European economy posted only moderate growth due to stagnation in capital investment, despite increasing personal consumption. The U.S. economy expanded due mainly to steady growth in personal consumption and housing investment while the Chinese economy also continued to post stable growth.

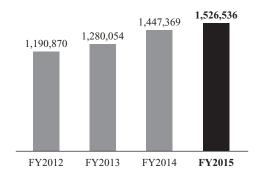

With regard to the principal markets for Kyocera Corporation and its subsidiaries ("Kyocera Group" or "Kyocera"), demand for smartphones grew in the digital consumer equipment market, and demand expanded in automotive market, mainly in the United States and China. Growth in the solar energy market in Japan slowed, however, due to the end of a government subsidy for introducing solar power generating systems for residential use and the impact of a halt in grid access applications by electric power companies.

During fiscal 2015, Kyocera worked to strengthen production capabilities in Japan and overseas as well as cultivate new markets with the aim of boosting sales in existing businesses. In the Components Business, sales increased mainly in automotive related markets, smartphones, communications infrastructures and various industrial machinery markets. In the Equipment Business, sales increased in overseas markets in particular due to the launch of new products and efforts to secure new customers. As a result, consolidated net sales for fiscal 2015 amounted to \(\frac{\frac{1}{3}}{3},526,536\) million, an increase of \(\frac{\frac{1}{3}}{3},167\) million, or 5.5%, compared with fiscal 2014. This result marked another record high following the record high posted in fiscal 2014.

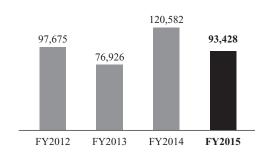

Profit increased in the Fine Ceramic Parts Group, Semiconductor Parts Group, Electronic Device Group and Information Equipment Group due to higher sales and the effect of cost reductions. Nonetheless, profit from operations decreased by ¥27,154 million, or 22.5%, to ¥93,428 million compared with ¥120,582 million in fiscal 2014, and income before income taxes decreased by ¥24,406 million, or 16.7%, to ¥121,862 million compared with ¥146,268 million in fiscal 2014 due mainly to the recording of loss in line with a review of asset valuation in the Applied Ceramic Products Group and Telecommunications Equipment Group. Net income attributable to shareholders of Kyocera Corporation increased by ¥27,119 million, or 30.6%, to ¥115,875 million compared with ¥88,756 million in fiscal 2014 due primarily to revaluation of deferred tax assets and liabilities in line with a revision of the tax system in Japan resulting in an increase of approximately ¥36,300 million in net income attributable to shareholders of Kyocera Corporation.

(3) Management Challenges

Kyocera has a wide range of management resources within the Kyocera Group, from materials technologies such as ceramics to components, devices, equipment, systems and services. Kyocera will strive to increase the sophistication of technologies accumulated over the years, enhance new product development, expand sales by making the best use of sales networks and further reinforce management foundations by exploiting the collective capabilities of the Kyocera Group, which includes bolstering ties between businesses and Group companies. By doing so, Kyocera aims to be a high-growth, highly profitable company. Kyocera will focus on the following challenges:

i) Expand business in key markets

Kyocera views the information and communications market, the environment and energy market, automotive related market and the medical and healthcare market as key markets and will strive to increase profitability by expanding existing businesses and creating new businesses in these markets.

In the information and communications market, Kyocera forecasts further proliferation and more advanced performance in digital consumer equipment, which includes smartphones and tablets, as well as an increase in demand primarily for high capacity and highspeed transmission in each industrial market. In line with these market trends, Kyocera will work to develop and expand sales of small, slim high-value-added products that meet needs as a means to increase sales and profit. In addition, efforts will be made to increase sales by releasing new products and cultivating new markets for telecommunications and information equipment that incorporate unique technologies and differentiate from the competition.

In the environment and energy market, Kyocera will push ahead with broad business development, from energy creating business through solar power generating systems to energy storage business through the supply of electricity storage units and energy saving business that seeks to enhance efficiency of power consumption through an energy management system. Additionally, Kyocera will aim to increase sales through initiatives to cultivate new markets and develop new products, which includes expanding application of LED lighting and developing fuel cell power generating systems.

In the automotive related market, Kyocera will seek to secure new business opportunities through a strategic project system in which market trends are viewed as opportunities for growth, namely the increased use of electrical systems and equipment in automobiles, environmental responsiveness and proliferation of automated driving. Group management resources will be combined on development, production and sales fronts and efforts will be made to increase market share by expanding application of existing products and cultivating customers and to accelerate new product development with the aim of boosting sales.

In the medical and healthcare market, Kyocera will expand the medical materials business, which includes artificial joints, and pursue synergies in materials, components and device technology in an effort to strengthen the development of new healthcare related products and expand this business domain. By doing so, Kyocera seeks to boost sales.

ii) Enhance management foundations

While working to overcome global competition, Kyocera will strive to expand production volume and production items in Vietnam as well as pursue comprehensive production cost reductions in order to strengthen the service system in the Asia region, which holds major production sites of customers. In Japan, Kyocera will work to further increase sophistication of production technology and expand production of high-value-added products. In addition, Kyocera will strive to strengthen existing businesses and create new businesses by making investment in business toward future growth aggressively, which includes the utilization of external management resources through M&As. The aim of these endeavors is to be a high-growth, highly profitable company.
